Education

William & Mary *Williamsburg, VA*
Master of Science in Business Analytics *2026*
- 3.82 GPA — Beta Gamma Sigma Honor Society

William & Mary *Williamsburg, VA*
Bachelor of Science in Computer Science *2025*
- 3.64 GPA — Cum Laude

Skills

Web Development: Git, TypeScript (React, Tailwind, Tanstack), JavaScript (Vue.js, Quasar, Leaflet, Jest), HTML, CSS

Agile Development: C, C++, Java, AWS (Lambda, Lightsail, S3), CI/CD (GitHub Actions), Docker, Automated Testing, Bash

Databases: Python, SQL, MySQL, Postgres, Web Scraping, Alteryx, Tableau, Psycopg2, Excel, Microsoft Office

Experience

JavaScript Developer Intern *Boulder, CO*
Viget *June 2026 – August 2026*
- Developed web applications and components using React, applying industry best practices for testing in a professional agency environment.
- Collaborated cross-functionally through client meetings, pair programming sessions, and development team meetings to contribute to digital product design and launch.

Software Developer *Williamsburg, VA*
Sunken Garden Solutions *June 2024 – May 2026*
- Directed front-end development for Thrillsburg, an app for discovering current events in Williamsburg.
- Advised incoming developers and oversaw implementation of user-facing designs with Vue.js and Quasar.
- Deployed dockerized database, API, and web-scraping infrastructure to an AWS production environment.

Analytics Consultant *Durham, NC*
Turbine12 *December 2025 – February 2026*
- Delivered analytical data visualizations to understand marketing and business performance.
- Created data-rich dashboards to clearly communicate information by metrics such as time, geography, and more.

Projects

Hearth *Boulder, CO*
Viget *July 2026*
- Built a full-stack office-attendance scheduling app in React 19, TypeScript, and Tailwind, delivering calendar and onboarding flows as reviewed PRs in an agency environment.
- Integrated the application with a Slack bot that lets users edit and confirm in-office days directly from interactive Slack DMs.

NBPA Scheduler *Boulder, CO*
Viget *June 2026*
- Shipped features on a custom-made app to help managers coordinate player visits and facility use for a Viget client.
- Wrote React components to fix backend Salesforce bugs, support repeated visits, and improve handling of default data values.

Thrillsburg *Williamsburg, VA*
Sunken Garden Solutions *June 2024 – May 2026*
- Coordinated with developers, engineers, and UI designers to deliver full-stack features such as mobile-friendly user experiences, automated web scraping, and database improvements.
- Managed code architecture and deployment infrastructure using AWS to prevent bugs and ensure stability.

Coursework and Recognitions

Relevant Courses: Algorithms (A), Software Development (A), Databases II (A), Machine Learning (A), Finite Automata (A)

Dean's List: Spring 2022, Fall 2023, Spring 2024, Fall 2024, Spring 2025
